

## AIR QUALITY ADVISORY

**FOR IMMEDIATE RELEASE:** September 25, 2021

**CONTACT:** Ralph Borrmann, 415.760.0285

### **Air District extends air quality advisory through Monday**

**SAN FRANCISCO** – The Bay Area Air Quality Management District is extending the current air quality advisory for wildfire smoke through Monday, September 27. An air quality advisory is currently in place for Saturday, September 25.

Smoke from fires in Southern and Central California is expected to continue to impact the Bay Area through Monday with smoky and hazy skies. Pollution levels are not expected to exceed federal health standards **and no Spare the Air Alert is in effect**. The Air District will closely monitor air quality throughout the region for smoke impacts from wildfires.

If the smell of smoke is present, it is important that Bay Area residents protect their health by avoiding exposure. If possible, stay inside with windows and doors closed until smoke levels subside, if temperatures allow. It is also recommended that those impacted by smoke set their air conditioning units and car vent systems to re-circulate to prevent outside air from moving inside.

Smoke can irritate the eyes and airways, causing coughing, a scratchy throat and irritated sinuses. Elevated particulate matter in the air can trigger wheezing in those who suffer from asthma, emphysema or COPD. Elderly persons, children and individuals with respiratory illnesses are particularly susceptible to elevated air pollution levels and should take extra precautions to avoid exposure.
