Air District extends air quality advisory through Monday

SAN FRANCISCO – The Bay Area Air Quality Management District is extending an air quality advisory for wildfire smoke through Monday, August 29.

Smoke from the Rum Creek Fire in southwest Oregon and the Six Rivers Lightning Complex Fire in northwest California is expected to impact the Bay Area through Monday. Elevated air pollution levels are likely. **However, pollution levels are not expected to exceed the national 24-hour standard, and a Spare the Air Alert is not in effect.** Smoky, hazy skies will be visible and the smell of smoke is expected to be present within the Bay Area.

The Air District will be closely monitoring air quality throughout the region for smoke impacts from the fire.

If the smell of smoke is present, it is important that Bay Area residents protect their health by avoiding exposure. If possible, stay inside with windows and doors closed until smoke levels subside, if temperatures allow. It is also recommended that those impacted by smoke set their air conditioning units and car vent systems to re-circulate to prevent outside air from moving inside.

Smoke can irritate the eyes and airways, causing coughing, a scratchy throat and irritated sinuses. Elevated particulate matter in the air can trigger wheezing in those who suffer from asthma, emphysema or COPD. Elderly persons, children and individuals with respiratory illnesses are particularly susceptible to elevated air pollution levels and should take extra precautions to avoid exposure.
