Map(s) clearly indicating:  Property lines / boundaries Rights of way / easements Areas to be cleared or graded Trenching areas Excavation sites	Storage areas / piles Track-out control Staging areas for removal Truck routes On-site parking lots	following information:  Geologic Information Topographical Maps Meteorological Data					

## REQUIREMENTS FOR ROAD CONSTRUCTION AND MAINTENANCE

Equipment and operations must not cause the emission of any dust that is visible crossing the project boundaries; and

The following dust control measures must be implemented during any road construction or maintenance activity:

Unpaved areas subject to vehicle traffic must be stabilized by being kept adequately wetted, treated with a chemical dust suppressant, or covered with material that contains less than 0.25 percent asbestos; **AND** 

The speed of any vehicles and equipment traveling across unpaved areas must be no more than fifteen (15) miles per hour unless the road surface and surrounding area is sufficiently stabilized to prevent vehicles and equipment traveling more than 15 miles per hour from emitting dust that is visible crossing the project boundaries; **AND** 

Storage piles and disturbed areas not subject to vehicular traffic must be stabilized by being kept adequately wetted, treated with a chemical dust suppressant, or covered with material that contains less than 0.25 percent asbestos; **AND** 

Activities must be conducted so that no track-out from any road construction project is visible on any paved roadway open to the public.
