AIR QUALITY
MANAGEMENT
DISTRICT

PUBLIC NOTICE

May 13, 2020

TO: Parents or guardians of children enrolled at the following school(s):

Thomas More School

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #30370 for the following source of air pollution:

**Soil Vapor Extraction
Exxon Mobile Corporation
3110 Mount Vista Drive
San Jose, CA 95127**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

An underground storage tank formerly located at the site leaked gasoline into the surrounding soil. The leaking tank has since been removed from the site. Exxon Mobile Corporation has proposed a system consisting of a vacuum blower to extract petroleum vapor from wells drilled at the site and Carbon adsorption vessels used for treatment of the extracted vapor. Emissions from the proposed source will be significantly controlled; however, it is not possible to control the source such that emissions are zero.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
