MANAGEMENT
DISTRICT

PUBLIC NOTICE

October 9, 2020

TO: Parents or guardians of children enrolled at the following school(s):

**St. Mary of the Immaculate Conception School
Fusion Academy Los Gatos**

All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #30606 for the following source of air pollution:

**Soil Vapor Extraction
McCarthy Santa Cruz Ave LLC
216 N Santa Cruz Ave
Los Gatos, CA 95030**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Soil samples analyzed at this site showed presence of chlorinated hydrocarbons. AEI Consultants on behalf of McCarthy Santa Cruz Ave LLC, has proposed a system consisting of a vacuum blower to extract the hydrocarbon vapor from wells drilled at the site and carbon adsorption vessels used for treatment of the extracted vapor. Emissions from the proposed source will be significantly controlled; however, it is not possible to control the source such that emissions are zero.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

If you are interested in getting more information, you may request copies of the District's evaluation report by calling the District at the telephone number listed at the end of this notice. This information is also accessible on the District website at:
