FROM: Bay Area Air Quality Management District

RE: Permit Application #31023 for the following source of air pollution:

**City of Santa Clara Park Service
Emergency Standby Diesel Engine Generator Set
2600 Benton Ave.
Santa Clara, CA 95051**

The Bay Area Air Quality Management District (the “District”) is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site, State law requires that we notify the public. To comply with this requirement, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source of air pollution. A description of the proposed project follows:

City of Santa Clara Park Service has applied for a standby diesel engine-generator set to generate power during emergency situations.
