BAY AREA AIR QUALITY MANAGEMENT DISTRICT

PUBLIC NOTICE

August 16th, 2023

TO: All residential and business neighbors located within 1,000 feet of the proposed new or modified sources of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #672680 for the following source of air pollution:

Soil Vapor Extraction System
Hazelwood SVE Plant
110 Hazelwood Drive, South San Francisco, CA 94080

The Bay Area Air Quality Management District (the "Air District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source of toxic air contaminants located within 1,000 feet of a school site or within a community that is overburdened by air pollution, we notify the public about the proposed project. To comply with Air District requirements, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed sources.

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced sources of air pollution. A description of the proposed project follows:

> Soil beneath this project site is contaminated with chlorinated volatile organic compounds and petroleum hydrocarbons. At the direction of San Mateo County Department of Environmental Heath, Trinity Source Group (Hazelwood SVE Plant) is proposing to install a Soil Vapor Extraction system (SVE) to remediate the contaminated soil. The proposed SVE will consist of a blower that will extract the soil vapor and vent it through a series of activated carbon and potassium permanganate adsorption vessels to reduce emissions prior to venting to the atmosphere.

PRELIMINARY EVALUATION

The Air District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable Air District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

The Air District's Community Health Protection Program is focused on reducing air pollution disparities in overburdened communities. For more information on Air District activities in your community, consult the Air District website at:

https://www.baaqmd.gov/community-health

If you are interested in getting more information about this project, you may obtain a copy of the Air District's evaluation report from the Air District website at:
