BAY AREA AIR QUALITY MANAGEMENT DISTRICT

PUBLIC NOTICE

April 16, 2025

TO: All residential and business neighbors located within 1,000 feet of the proposed new or modified source(s) of air pollution listed below.

FROM: Bay Area Air Quality Management District

RE: Permit Application #32088 for the following source(s) of air pollution:

Laser Metal Cutter
Moz Designs
711 Kevin Court, Oakland, CA 94621

The Bay Area Air Quality Management District (the "District") is a local agency that regulates stationary sources of air pollution such as factories, industrial sites, and gasoline stations.

Whenever we receive a permit application for a new or modified source(s) of toxic air contaminants located within 1,000 feet of a school site or within a community that is overburdened by air pollution, we notify the public about the proposed project. To comply with Air District requirements, we distribute or mail a Public Notice to the parents or guardians of students enrolled at schools located within ¼ mile, and all residents and businesses located within 1,000 feet, of the proposed source(s).

You are receiving this Public Notice because a permit application has been filed with the District for the above referenced source(s) of air pollution. A description of the proposed project follows:

Moz Designs has applied for an Authority to Construct and/or Permit to Operate for the installation of the following new equipment in order to cut both steel and aluminum in the manufacturing of their products:

S-4 Laser Metal Cutter abated by **A-1 Dust Collector, Donaldson Torit Downflow Evolution, Model DFLS6, six filter packs, total filter area of 1,524 ft², Equipped with a HEPA filter**

Moz Designs currently operates three coating spray booths at their facility. Emissions from S-4 laser cutter will be routed to a single stack connected to a dust collector equipped with a HEPA filter (A-1) and the abated emissions from A-1 will vent within the building and will be exhausted out into atmosphere.

PRELIMINARY EVALUATION

The District has evaluated the permit application for the proposed project and has made a preliminary determination that the project is expected to comply with all applicable District, state, and federal air quality-related regulations, including the health risks resulting from toxic air contaminant emissions. The preliminary recommendation is to issue a permit for this project. After considering all comments received, the District will make a final determination.

ADDITIONAL INFORMATION

The Air District's Community Health Protection Program is focused on reducing air pollution disparities in overburdened communities. For more information on Air District activities in your community, consult the Air District's website at:

https://www.baaqmd.gov/community-health

If you are interested in getting more information about this project, you may obtain a copy of the District's evaluation report from the Air District's website at:
