RE: TITLE V MONITORING REPORT
Corteva Agriscience – Pittsburg Operations, Pittsburg, California (Corteva)
Facility Number A0031
Plant Number 24380
Reporting Period: – December 1, 2025 – May 31, 2026

Corteva Agriscience hereby submits the following Title V Monitoring Report for its Pittsburg Operations for the period noted above.

A Reasonable Inquiry process was followed to review the monitoring requirements of the Title V permit. All required monitoring was performed, and after reviewing the monitoring results all sources were found to be in compliance with the monitoring requirements of Table VII of the Air Permit except for the items previously submitted as Title V deviations to the Air District during the reporting period.

Based on information at the completion of the reasonable inquiry process, I certify that the information is true, accurate, and complete to the best of my belief.

If you have any questions regarding this Monitoring Report, please email Paula Alba Green at paula.albagreen@corteva.com.

Sincerely,

Kathryn Mowrey
Pittsburg Site Director
Corteva Agriscience

RE: 30-Day Report – Major Facility Permit Non-Compliance Report
Corteva Agriscience – Pittsburg Operations, Pittsburg, California
Facility Number A0031
Plant Number 24380

Mr. Gove:

Description of Non-Compliance referencing Permit Condition Number:

Source Number:	Not Applicable
Permit Condition Number:	Table 7 of Subpart NNNNN --> §63.9(j)
Describe Non-Compliance:	During an internal review for the Manufacturing Services plant (HCl MACT affected source), it was noticed that the HCl MACT Notice Of Compliance Status (NOCS) documentation was not updated to reflect the shutdown of Manufacturing Services Halogenated Acid Furnace (MS-HAF) that occurred on June 5, 2025. The NOCS referenced the MS-HAF as a backup control device. The updated NOCS capturing the process change had a notification date of June 20, 2025. There were no excess emissions or operational upsets as a result of this administrative oversight.
Root Cause:	The HCl MACT periodic report does not include any references to the MS-HAF. At the time of submission last year in July 2025, staff assumed there were no references to be updated in the NOCS.

Corrective Action(s):

- HCl MACT NOCS was updated and sent to the EPA on February 27, 2026.
- No further corrective actions are required. There will not be any process changes until HCl production ceases as included in the Corteva Pittsburg site shutdown plans. Also, the facility had applied to become an area source in 2025, so the HCl MACT will not be applicable once that application is approved.

If you have any questions, please contact Paula Alba Green at paula.albagreen@corteva.com.

I certify that the above information is true, accurate, and complete to the best of my information and belief.

Sincerely,

Kathryn Mowrey
Pittsburg Site Director
Corteva Agriscience

RE: Major Facility Permit Non-Compliance Report, 10-Day Notification
Corteva Agriscience – Pittsburg Operations, Pittsburg, California
Facility Number A0031
Plant Number 24380

Description of Non-Compliance referencing Permit Condition Number

1.	Source Number:	Not Applicable
2.	Permit Condition Number:	Table 7 of Subpart NNNNN --> §63.9(j)
3.	Describe Non-Compliance:	During an internal review for the Manufacturing Services plant (HCl MACT affected source), it was noticed that the HCl MACT Notice Of Compliance Status (NOCS) documentation was not updated to reflect the shutdown of Manufacturing Services Halogenated Acid Furnace (MS-HAF) that occurred on June 5, 2025. The NOCS still referenced the MS-HAF as a backup control device. The updated NOCS capturing the process change should have been submitted by June 20, 2025. There were no excess emissions or operational upsets due to this administrative oversight.
4.	Submitted By:	Paula Alba Green (paula.albagreen@corteva.com)
5.	Discovery Date:	February 11th, 2026
