Electronic Submittal

Subject: 10-Day Notice of Non-compliance Report and 30-Day Follow-up Report for Tank CC-26 at SFPP, L. P. Concord Station (Facility #A4022) - 1550 Solano Way, Concord, California

Dear Director of Compliance and Enforcement:

In accordance with Condition I. F. of the Title V Operating Permit, SFPP, L.P. ("SFPP") is providing this non-compliance report to the Bay Area Air Quality Management District ("BAAQMD") for tank CC-26 (S-26) located at its Concord Station. The tank is an internal floating roof tank, in gasoline service at the time of the discovery. This also serves as the non-compliance report per GD GACT (40 CFR 60.115b(a) (3) and (4)) requirements.

At around 11:45 AM on January 27, 2021, during the routine quarterly inspection, the tank inspector discovered a damaged column well seal in tank CC-26 (S-26). The seal was repaired immediately. There was no product on the tank roof, and no LEL detected during the inspection. The tank was re-inspected after it was filled with diesel on January 29, 2021, and the repaired column well was found not function properly. The tank was emptied at 06:00 AM and degassing was completed at 03:00 PM on February 1, 2021. The tank will be further repaired and re-inspected prior to return to service.

Please note, CC-11 is connected to the vapor combustion system onsite.
